

User Manual

Exploring the App Store

1.1 - Catalog Overview

Upon opening the app store, you will be directed to the home page. Here you can access all functions of the app from logging in, to sorting apps, submitting a request, and searching for apps.

1.2 - App Icons

The store features different buttons containing information about each app. If one of these buttons is clicked, more information about the app will be displayed.

Logging In

2.1 - Sign Up

Although it is not required to have an account, it is recommended as you must be logged in to comment on apps. To sign up, simply press the Login button and then press Sign Up. From there enter your desired username and then type and retype your password. Upon creating your account you will be automatically logged in.

2.2 - Locked Features

You must be logged in to access some features and have special privileges for others. For example, you must be logged in to comment on an app, and you must have moderator privileges to delete comments. You also must have admin privileges in order to view the pending requests.

Interacting with Apps

3.1 - Viewing App Info

To view more information on an app, simply click on its icon from the homepage. This will bring up more information such as a description, link to the app, and the comments that have been left on the app.

3.2 - Leaving a Comment on an App

In order to leave a comment on an app, you must first log in (See 2.1). From there simply type your comment on the text field and press add comment. In order to see any comments you made, you must close the app information and reopen it.

3.3 - Deleting Comments

Only moderators have the ability to delete comments. To delete a comment, simply select which comment you want to delete and press the delete comment button.

Requests

4.1 - Submitting a Request

To submit a request, simply press the button labeled “Submit Request” and add a link and description of the app you want to be added. The admin will do the rest if they decide to approve your request.

4.2 - Accepting or Denying a Request

In order to accept or deny requests, you must be an administrator. If you want to approve a request, all relevant fields must be filled in before the request can be approved. Denying requests is as simple as pressing the deny button.

Filtering, Sorting, and Searching for Apps

5.1 - Filtering and Sorting Apps

Apps can be filtered and sorted by their category and price - low to high or high to low. To set the filtering and sorting, select an option from each dropdown box and press “Confirm”. To clear the filtering and sorting, select “None” in both drop down menus and press “Confirm”

5.2 - Searching for Apps

Apps can be searched for by simply entering part of their name - ex. Searching “Clash” will bring up all apps with “Clash” in their name. Searching for apps is NOT case sensitive. To clear your searching, clear the text field and press the search button.
